

*Health* and *Quality of life*  
is the  
*Ultimate Goal*

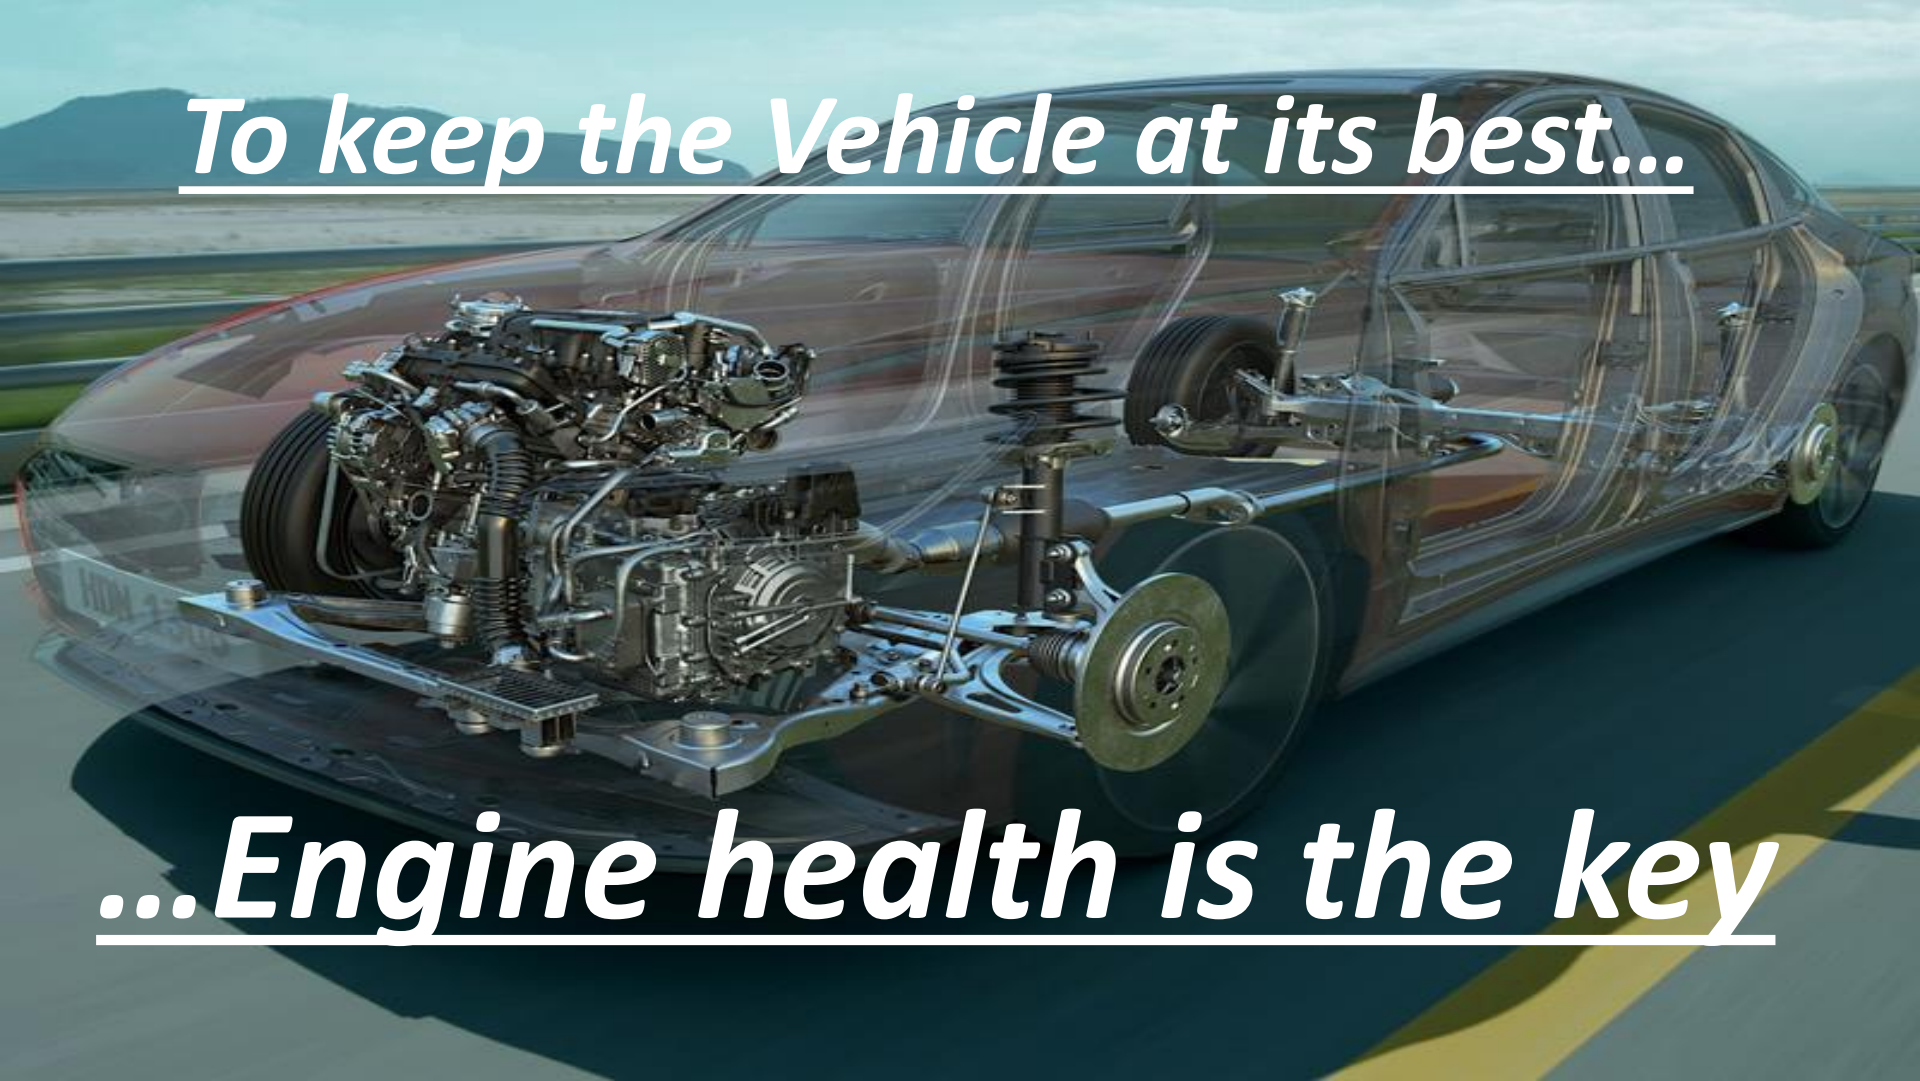

**Health and Quality of life is the ultimate goal,  
Be it ours or ours vehicle**

*To keep the Vehicle at its best...*

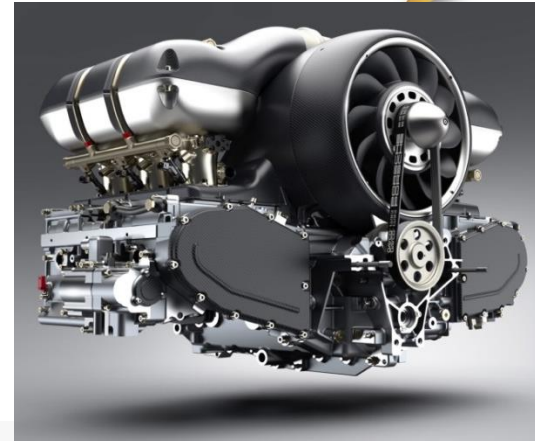

*...Engine health is the key*

# Why Engine Health is Important?

## Engine Health: Keep vehicle working at its best

- There are many benefits to ensure Vehicle's engine is in good health & working order.
  - For one, it will live longer, and will be less likely to suffer breakdowns as it ages.
  - Enjoy lasting performance, with minimal dips in speed, responsiveness and fuel efficiency.
  - And, regular engine maintenance will help the car's value intact.

# Vehicle Health, Engine Health & Our Health

Are

Interlinked

In India, 1 car emits  
4600 kg of carbon  
dioxide every year\*

To absorb this, ~220  
fully grown trees are  
required^

\*<https://www.epa.gov/greenvehicles/greenhouse-gas-emissions-typical-passenger-vehicle>

<http://urbanforestnetwork.org/benefits/air%20quality.htm>

1 in 8 death every year is due to lung diseases caused by bad air quality

India has 6/10 most air polluted cities in the world

We need to think,  
What causes this pollution?  
What is our role in this  
pollution?

It is our responsibility to take care of our  
environment

Presenting you a solution to make your vehicles engine more efficient and contribute towards environment

A Unique & Revolutionary Technology,  
to enhance engine efficiency and also reduce pollution

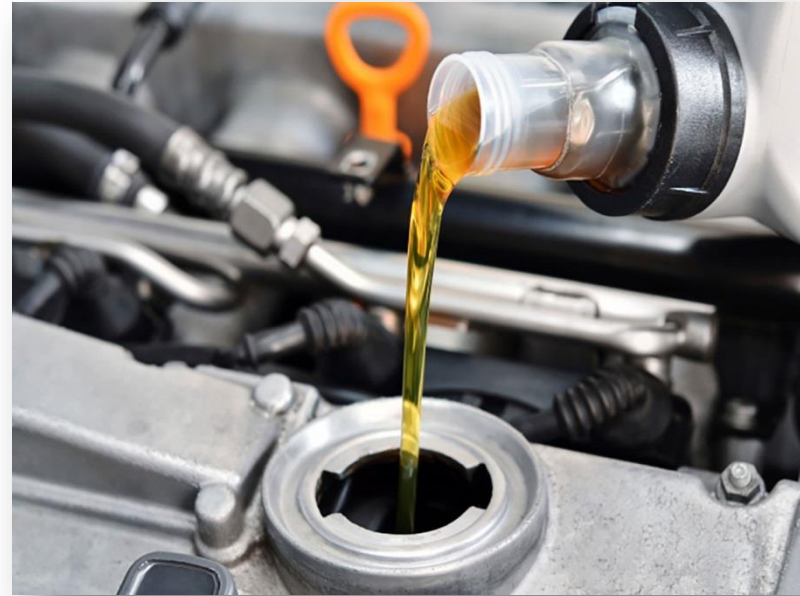

**MACH-DRIVE**  
**NanoEnergizer**<sup>®</sup>  
ENGINE PLATINUM CERAMIC COATING

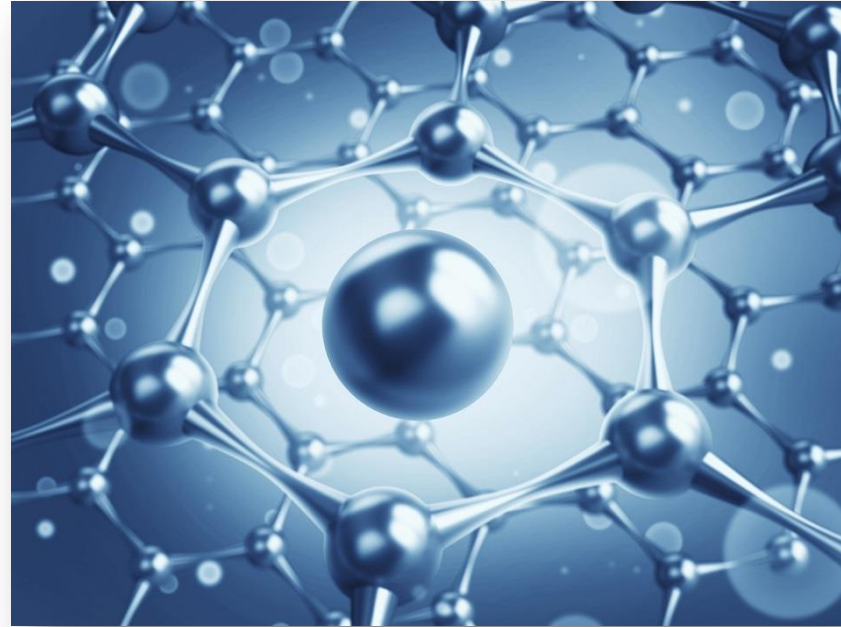

# What is MACH-DRIVE NanoEnergizer

- MACH-DRIVE Nano Energizer is an additive for engine along with Engine oil for better engine health
- It gives platinum ceramic coating to engine, platinum is 20 times harder and 5 times shiner than steel
- The result is a smoother, quieter engine with more power and better mileage

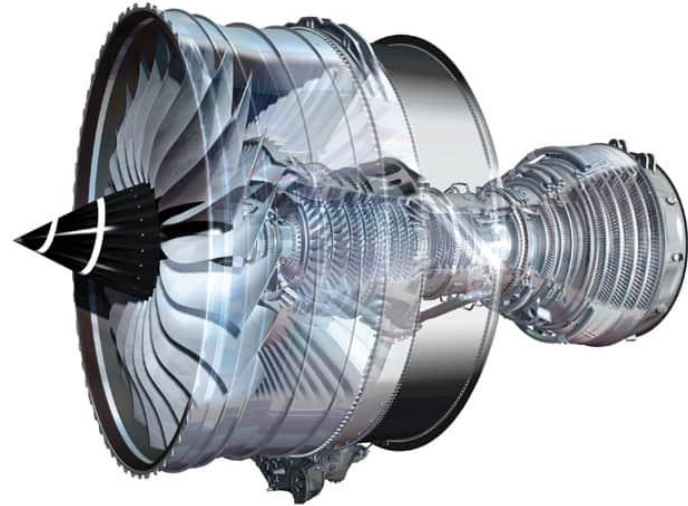

# What is MACH-DRIVE NanoEnergizer

- **A Unique & Revolutionary Technology**  
**MACH-DRIVE** is a perfect **Nano Cermet** - which is produced using a **Ceramic plus Metallic Coating Technology**.
- It contains **20 Nano Meter Platinum Coated Zirconium Powder** emulsified in mineral oil which is ideal for engine **restoration & protection**.

# What is MACH-DRIVE NanoEnergizer

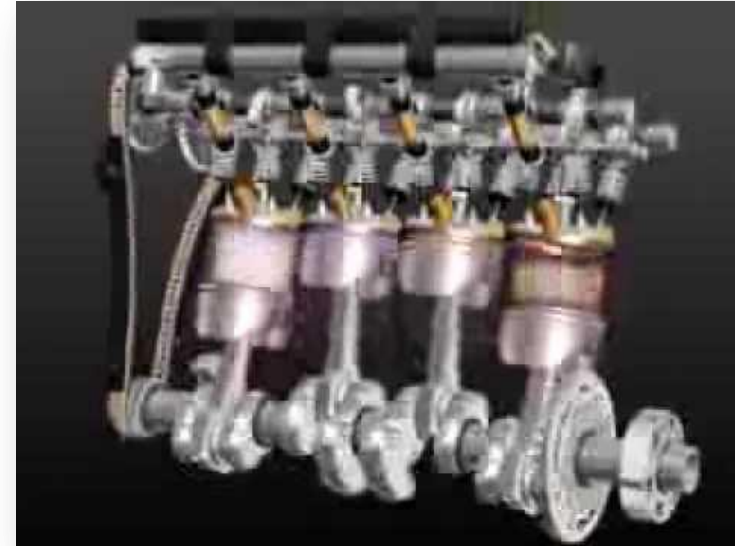

- Platinum is **20 times harder and 6 times smoother than steel**, these Nano particles create a hard & smooth coating layer on all the friction surfaces & moving parts inside the engine
- Zirconium coating acts like a **thermal barrier coating inside the engine cylinder and prevents heat loss.**

# What is MACH-DRIVE NanoEnergizer

- This is the only technology in the World which can convert any BS-IV Engine into BS-VI Engine without ever opening it for the next **30,000 Kms.**
  - It reduce **Engine drag, friction and noise**
  - Bring engine **power to 100%**
  - **Increase compression**
  - Restore and **protect engine**
  - **Reduce fuel** consumption
  - Educe **harmful exhaust emissions of all engines**

# MACH-DRIVE NanoEnergizer Benefits

**IMPROVES MILEAGE  
UPTO 15% SAVING**

**MORE PICKUP**

**REDUCES NOISE AND  
VIBRATION LEVELS**

**RESTORES FRICTION  
SURFACES AND ENHANCES  
ENGINE LIFE**

**REDUCES OVERALL  
EMISSION UPTO  
70%**

**SINGLE COATING  
LASTS UPTO  
30,000 KMS**

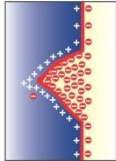

# MACH-DRIVE NanoEnergizer: Improves Engine Efficiency

- Brings engine power up to 100%
- The Nano Energizer uses Revolutionary & Patented Nano Ceramic Technology It allows for easy Treatment of Engines and Restores, Repairs & Protects.
- Ceramic coating, especially with Zirconium, has a beneficial effects on engine efficiency and performance

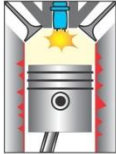

*ifs NANO*

**Excellent Ceramic cermet coating Restoring process**  
nano powder mixed with engine oil heals worn-out engine.

**Self-restoring effect:**  
Cracked parts have high electric potential and charged particles are moved selectively. Tight nano particle cohesion is conducted by heat and pressure.

After restoring, cracked parts of engine is recovered, and the nano powder forms lubricant membrane on inner wall of engine.

Before	After
	

**Recovery State**  
Surface before & after nano powder treatment

# MACH-DRIVE NanoEnergizer: Improves Fuel Saving

- Fuel saving upto 15%
- Better mileage
- 9<sup>th</sup> fuel filling could be free

Suppose, your vehicle's current mileage is 60 km per Rs 100-worth fill, after using NanoEnergizer (post 500 km run), if the vehicle's mileage goes up to 69 km per Rs 100-worth fill, it implies that the mileage (5-15% savings) has increased such that your savings are equivalent to the cost of a ninth filling.

\*Disclaimer: On an average 10% savings is arrived by testing an engine under test conditions and will vary according to the usage conditions and vehicles.

# MACH-DRIVE NanoEnergizer: Reduces emission

- Platinum coating helps to reduce emission upto 70%
- It also reduces noise and vibration

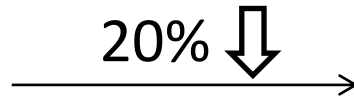

# Eco-friendly MACH-DRIVE NanoEnergizer: Reduces CO<sub>2</sub>

- 1 passenger vehicle emits 4600 kg of Carbon Dioxide (CO<sub>2</sub>) in a year
- By using MACHDRIVE, you are reducing 20% CO<sub>2</sub> emission per vehicle

**Without MACHDRIVE**  
4600kg CO<sub>2</sub> every year

**With MACHDRIVE**  
3650kg CO<sub>2</sub> every year

# MACH-DRIVE NanoEnergizer: One time application

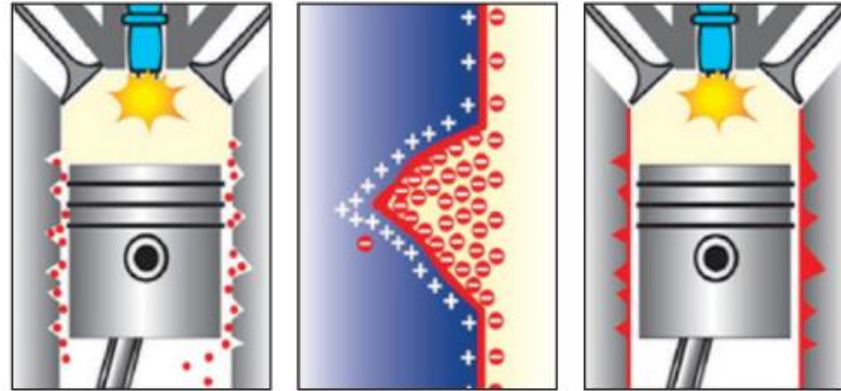

- Single time coating last up to 30,000 km
- After 30,000 km, apply again and make engine new again

# How does MACH-DRIVE NanoEnergizer works?

- **Ceramic coating nanotechnology.** 20-nanometer, platinum-coated ceramic beads is to **reduce wear, increase compression and longevity.**
- The new generation of ceramic coatings (zirconium oxide), Zirconium, or  $ZrO_2$ , is a ceramic material that has been proven to be the most appropriate for engines. A single Injection ensures a powerful engine with **smoother, quieter, more economical** operation.

# Change in Engine after MACH-DRIVE NanoEnergizer

**Before**

**After**

**MACH-DRIVE  
NanoEnergizer  
Makes Vehicle  
Engine Almost New**

# MACH-DRIVE NanoEnergizer

- With MACH-DRIVE NanoEnergizer  
**avoid frequent service station  
visits**
- **Save time and money**

# Why MACH-DRIVE NanoEnergizer even in lockdown?

- Due to Lockdown, our vehicles are parked since long
- This can make the engine oil settled at bottom
- **Sudden self start can lead to serious injury to engine, even it can seize**
- **Platinum coating can prevent damage to engine and can repair it**

# How to apply MACH-DRIVE NanoEnergizer?

- It can be applied **after the engine oil is changed**, there is no need for re-dosing, recommended to change **upon driving 30,000 km.**

## Injection Method:

- Shake Nano Energizer enough (50 times) before injection. Open oil filler cap and inject Nano Energizer slowly.
- Close oil filler cap and keep idle for 20 minutes or drive 30km.
- Do not change engine oil for next 400km for 2W/3W and 1200km for 4W

# MACH-DRIVE NanoEnergizer Certifications

**MACH-DRIVE**  
NanoEnergizer is certified  
from various vehicle  
manufacturers

Mercedes-Benz

**Audi**

**TOYOTA**

**HONDA**

**HYUNDAI**

**GM DAEWOO**

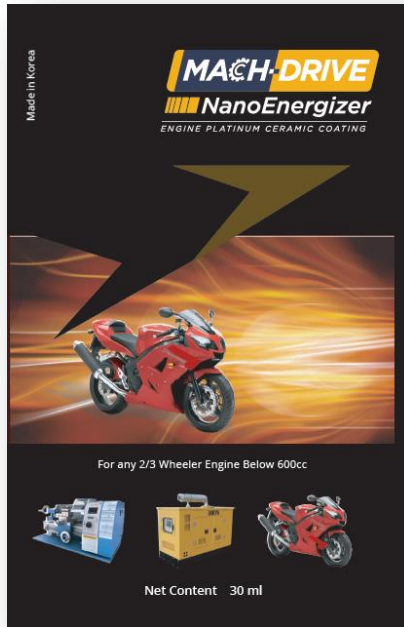

# **“Better Engine, Healthier World” with MACH-DRIVE NanoEnergizer**

An additive, it gives a platinum coating to the engine

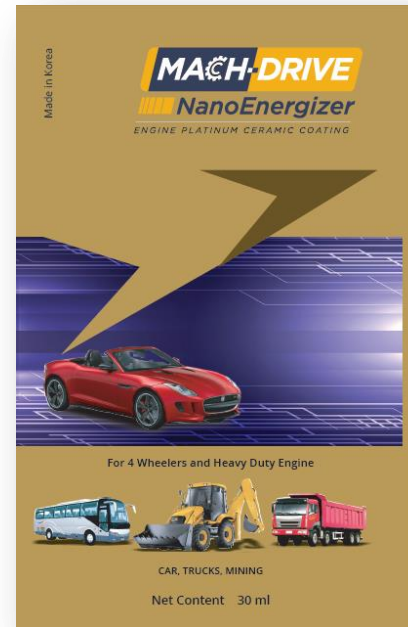

- 1. Eco friendly (Reduces CO<sub>2</sub> emission)**
- 2. Enhances engine life (makes it almost like new)**
- 3. Increases horse power (efficiency ^15%)**
- 4. Better mileage (fuel saving ~15%)**
- 5. Reduced Air & Noise pollution**
