Our Vestige World

Dear Vestigians,

Good morning to you all!

What a spectacular year our 14th year of excellence in thought and in action turned out to be. It gives me immense pleasure to announce that we have been constantly expanding globally and have recently opened up operations in Bangladesh, providing 165 million people of the country an excellent opportunity to earn Wellth and climb higher up the ladder of success with the unmatched Vestige way. In this year, as we gear up for furthering the global expansion, I once again seek your support in growing and spreading Vestige, because without you all, and your hard work, this impressive journey of Vestige, this outstanding growth of Vestige, would not have been possible.

We all are well aware of the threat posed by contaminated water to our wellbeing and we know that water, along with food and air, is one of the three important components of Cellular Nourishment Therapy that helps us acquire good health and prevent diseases. Still, getting pure drinking water is a persistent challenge in a country like India, where the water bodies are constantly getting polluted due to several factors. Water-borne diseases are on the rise and in many cases, they have acquired epidemic proportions. We all need to ensure that our family members drink the best and the purest quality of water and in view of this, Vestige, in association with Sharp, is bringing you a revolutionary four-filter and disruptor technology-enabled water purifier. The Sharp Water Purifier at your home and workplace will ensure that each drop of water you consume is safe and healthy.

This year we will reach our 15th year and cross the milestone of one and a half decades of spreading Wellth and transforming lives. There are very few direct selling companies, especially Indian-origin direct selling companies, which survived a decade in this competitive and challenging domain. The unbridled growth and constant expansion of Vestige is a testimony of the resilience of our unique business plan, the comprehensive education system, the best quality products and above all, the indomitable people like you, who carry ahead the beacon of Wellth, surmounting all challenges that lie on your way.

We all know that Vestigians are a special kind of human beings; they are tempered as steel is tempered in fire. Nothing in this world can demoralise, distract or deter a Vestigian who has imbibed the Vestige philosophy and has started living the Vestige dream. A true Wellth revolutionary – each Vestigian – is here to create a story that no one has ever heard, no one has ever seen. Each one of you knows and believes that nothing is impossible for you to achieve because you have the robust Vestige platform. I am sure, that with this conviction you will carry forward the task of spreading the joy of Wellth with one and many, and transform more lives in the days to come.

Wish You Wellth!

HEALTH 2 YOU

THROUGH PURE WATER- **THE ESSENCE OF LIFE**

Good health cannot be described in the most literal sense due to the broader spectrum of the meaning of health. It's an ongoing process rather than being the goal itself. Good health is acquired, maintained and developed through a multitude of ways; most important of these are exercise, a wholesome lifestyle, good eating habits, a conducive environment and stress-free living, With the advent of a modern, always-on-the-go lifestyle, people are left with very little time for self-care, thus, it has become imperative to discover methods to achieve good health and live a joyful life. In this scenario, preventive healthcare in the form of wellness has played a crucial role in helping people improve their health and achieve their goals.

Wellness comes mainly through nourished cells and water. Water, which covers two-thirds of the world, is one of the crucial components of cellular nourishment besides air and food. Good quality water is undeniably a great contributor for a healthy body. However, despite the presence of an enormous volume of water in the world, potable water is rapidly becoming a scarce resource. Each year the world is actually moving towards a drought because of severe pollution, ecological imbalance, wastage, and population growth. The quality of water is also deteriorating rapidly and it's already a major health hazard.

The major factors that are negatively impacting the quality of drinking water are physical impurities, chemical impurities and biological impurities. Physical impurities are mud, sand, fly ash, metals, Manganese, Sodium, salts and mining waste that get mixed with water at different stages. Chemical impurities consist of Chlorine (Cl), acids, inorganic compounds, (Sulphide and Ammonia) and organic compounds through decay. Biological impurities consist of unhygienic discharge of sewage, algae, different types of bacteria, protozoa, viruses, parasites, cysts (eggs) and e-coli.

While the physical impurities cause turbidity, colour, odd taste, foul odour in water, the chemical impurities and biological impurities are far more sub-layered and hardly noticeable with the naked eyes and other sense organs. While chemical impurities prevent the water from self-purification, the biological impurities cause diseases that at times become epidemic.

According to the WHO¹, contaminated water can transmit diseases such as diarrhoea, cholera, dysentery, typhoid, and polio. Contaminated drinking water is estimated to cause 502,000 diarrhoeal deaths each year. This is not all, the same observation claims that by 2025, half of the world's population will be living in water-stressed areas. Arsenic², a major threat to health, is also mostly found in contaminated groundwater. Inorganic arsenic is naturally present at high levels in the groundwater of a number of countries, including India. Drinking water, crops irrigated with contaminated water and food prepared with contaminated water are the sources of exposure to severe health hazards.

In such a perilous situation, it becomes very important to ensure that the quality of the water people use is up to the mark and provides good health. The purity of water can be guaranteed only through a rigorous engineering process that can kill the germs and bacteria in water effectively, without damaging the essential nutrients. It's imperative to use a water purifier with multiple layers of filtering and purification to ensure that all germs and bacteria are killed before the water is consumed.

Healthy water will ensure a better quality of living by helping to boost metabolism, energise the body, better weight management, make the skin healthy, reduce bad breath, remove toxins and prevent cramps and sprains caused due to dehydration. A well-hydrated body in an environment like India's will help people in preventing many health issues that arise with less consumption of water.

If we emphasise on drinking adequate and pure water every day, we will definitely strengthen our immunity quite naturally and remain in a qualitatively better stage of health. In the days to come, good health will not only be measured by the food one eats, or the lifestyle one lives, but also by the water one drinks and the air one breathes. To raise the standard of drinking water is a big leap ahead in the pursuit of overall wellness that will act as preventive healthcare.

I have achieved immense success with Vestige and the credit goes to the great products and full proof business plan of the company.

I was working in other ventures earlier and my experience was not pleasant. Due to the prior unpleasant experience I was sceptic about the success of Vestige business plan and started as a consumer. However, as soon as I got miraculous results after using the products I joined the system as an independent distributor and made Vestige business my full time profession. I have achieved immense success with Vestige and became a Double Universal Crown Director. This incredible growth and success are results of the great products and the robust business plan of Vestige. I thank my upline, my downlines and the Vestige management for my success.

It is only because of Vestige and its amazing marketing plan that today I am able to have the life I always wanted to.

Vestige came in my life and changed my life for the better. Prior to joining Vestige as a distributor, I had no remarkable identity of my own. Thanks be to Vestige that today I have made my own identity as one of the leading women entrepreneurs in the Vestige system. I have transformed many lives and added success to the lives of many through the Vestige path to ensure my own success. Reaching this level of success, riding a dream luxury car, living a luxurious life and becoming an icon of inspiration for other women are few things, among many others, which make me feel extremely great in Vestige. I thank Mr Bali and the management, my inspiring upline and my supportive downlines for my success. If I have reached this level, then anyone else, especially our hardworking women entrepreneurs, can also achieve this level of success.

We joined the direct selling industry in 2005 with big dreams. Prior to that we were into other business and had our own showroom. However, despite working for 11 years, we couldn't see an iota of success. Then finally, on 14th March 2016 we started our Vestige journey, thanks to our uplines GK Jadeja and SP Bharill, who showed us this path to incomparable success. What I like the most about Vestige is the wonderful effective product range available at an affordable price. I look forward to crossing greater milestones of success in the coming days.

We were associated with another direct selling company for more than 10 years. There, though we reached a certain level, however, it was not benefitting our team members. Then the Vestige opportunity came as God's blessing and we thought that this is the only formula on earth to fulfil our dreams. Now, we are living a luxurious lifestyle and also helping our team members to achieve immense success in this business. We thank our uplines and the management for this grand opportunity provided to us.
